

12-1-93

Returned F.D.'s call - everything is going well - had some great talks with Benedict who will fill us in with some suggestions via Syracuse - he has a cold but the sore throat is gone - will work on the papers probably tomorrow.

12-4-93

Spoke with Benedict. He sensed F. is repentant and a unique case. F. claims no sexual contact. I said that the victim is convinced of being molested but very unsure of details. We are reluctant to encourage psychiatric probing due to "false memory." Depending on the assessment, Benedict could foresee part-time hospital residency in Syracuse for Frank. He would be willing to help.
